

Creating **smarter**, more **connected** schools

FUJIFILM Business Innovation Australia Education Solutions Digital solutions that simplify learning, teaching and operations.

Connecting learning, teaching and operations

Education is evolving - and today's schools must deliver outstanding learning experiences while managing growing administrative demands, funding pressures, and increasing expectations from families and regulators.

At FUJIFILM Business Innovation Australia, we help K-12 schools create connected digital ecosystems where people, processes, and technology work together. Our solutions simplify operations, free up time for teaching, strengthen communication, and create better outcomes across the school community.

Up to

of tasks in the education sector are automatable with current technology.1

Supporting schools at every step

Simplifying administration and records

Reducing time spent on manual processes gives staff more capacity to focus on students and strategy. We help schools digitise the way they collect, manage and store key student and operational information.

Use online forms to collect enrolment, medical and permission details.

Send submissions and approvals to the right people with minimal delay.

Digitise student records to support compliance and reduce paper handling.

Provide authorised staff with secure access to records from any approved device.

Automating school workflows

School business and finance teams are under pressure to do more with fewer resources. We help reduce the burden by automating time consuming tasks and improving visibility across core functions. Our workflow tools help create more consistent processes and reduce the effort involved in managing finance and admin tasks.

Automate accounts payable and receivable to reduce manual processing.

Improve reporting and forecasting with integrated financial data flows.

Reduce compliance risk through consistent, traceable digital workflows.

Capture and organise supporting documents for approvals and audits.

Support staff by reducing time spent on repetitive administrative work.

Modernising school wide communication and print

Communicating with your school community is essential – whether you're promoting enrolments, sharing updates or managing internal information. We help schools reduce their communication overhead while staying consistent and on brand.

Track and manage print usage across staff and students while staying consistent and on brand.

Reduce operating costs with managed print services and print procurement.

Send updates to families using integrated print and SMS communications.

Ensure branding and tone remain consistent across all outbound material.

Supporting secure access to information

As more school staff work beyond the classroom – whether during school holidays, on excursions, after hours or from home – secure access to documents and systems is essential. We help schools centralise their content and make it easier for staff to access the information they need, whenever and wherever they're working. We also support classroom collaboration through smart, connected technology.

Provide mobile-friendly access to school systems and shared documents.

Manage access controls to protect sensitive student and staff data.

Centralise content to help staff find and use information more easily.

Support engaging learning experiences with interactive classroom displays.

Leading your school's digital transformation

Every school is on its own digital journey – and we're here to help guide it.

Our solutions are built to grow with your needs, improve integration, and support long-term outcomes across learnings, teaching and operations.

Tailor digital solutions to align with your school's goals, budget and existing systems.

goals, budget and existing systems. Help reduce admin pressure by digitising

repetitive and paper-based processes.

Identify opportunities to improve communication, document control and workflow.

Provide training and support to help your staff confidently adopt new systems.

"Before FUJIFILM's solutions, we were spending hours managing individual devices. Now we can push updates and apps across the school in a fraction of the time." — Luke, ICT Lead, Emmaus Christian School

Delivering real impact for schools

With FUJIFILM Business Innovation Australia, you're choosing a partner focused on education outcomes — not just technology delivery.

Maximise your technology investment and extend your budget further.

Build stronger collaboration between teachers, students, and families.

Provide practical, hands-on training to build staff confidence and capability.

Create a future-ready digital ecosystem that evolves with your school's needs.

How we work with schools

Every school is unique — and so is our approach.

We work closely with you to understand your specific needs, challenges and goals, then tailor solutions that fit your environment and priorities.

From initial consultation through to solution design, implementation, training and ongoing support, we partner with you every step of the way to ensure lasting impact across your entire school ecosystem.

Let's create **smarter**, more **connected** schools

Discover how FUJIFILM Business Innovation Australia can help your school thrive today.

Why FUJIFILM Business Innovation Australia?

3,000+ schools supported across Australia.

1,000+ Australian staff dedicated to helping education thrive.

60+ years of experience improving how schools manage data, documents and operations.

Integrated solutions across IT, automation, and communication tailored for K-12 needs.

We combine deep education expertise with a future-focused approach, delivering integrated solutions that connect learning, teaching and operations in smarter ways.
